Business Audit (Passed)

SolidHash combines automated and manual KYB and KYC checks that fully automates company verification and AML screening. The full KYB flow involves manual intervention by legal experts, who scrutinize all the documents submitted by applicants and perform required registry checks.

State analyses, global corporate records, PEP, and Sanctions database data are used to analyze final beneficiaries and shareholders. In addition, continuous monitoring and automatic controls ensure that businesses remain compatible

Whitepaper Review (Passed)

A white paper is an in-depth report or guide about the project and the problems trying to solve . It is meant to educate readers and help them to understand and solve an issue.

As part of our comprehensive review of clients' white papers, we:

- 1- Analyze project's Idea, Information , and token sales structure.
- 2- Confirm that the representations made in a whitepaper are complete and not misleading;
- 3- Review existing relationships with third parties engaged in marketing a token sale to ensure compliance .
- 4- Analyze economics to reduce or eliminate the risks associated.
